AI is reshaping the economics of IT services by increasing delivery productivity and the relationship between headcount, billable effort, revenue and outcome. Against this backdrop, we are sharpening our M&A strategy, prioritizing value creation and specialized acquisitions with a strong AI-driven strategic fit over scale-driven M&A. We therefore realign from an absolute revenue target to a qualitative target maintaining our growth momentum while increasing our focus on profitability and value creation.

Profitability improvement and high value-added ambitions Reinforced

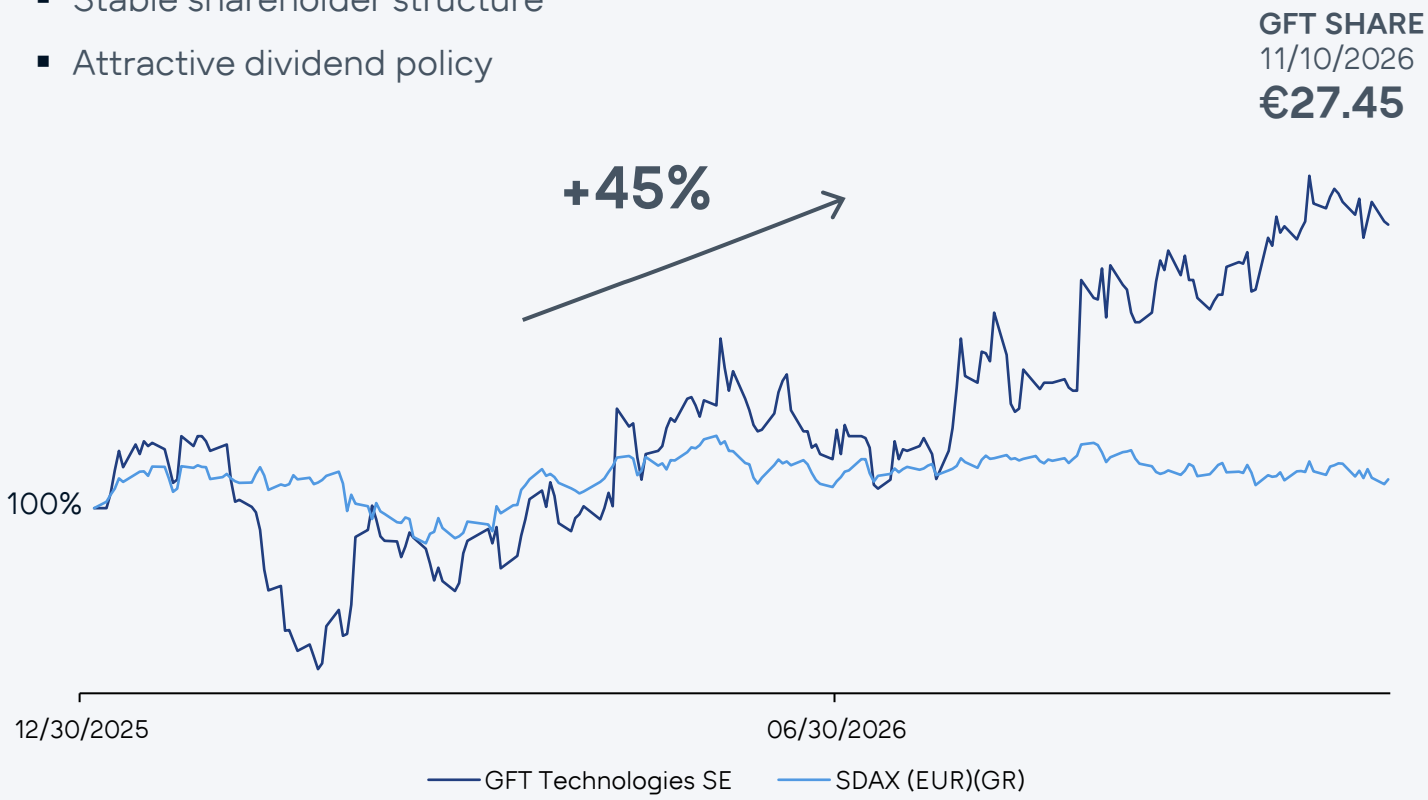

Portfolio shift towards AI-Native Engineering and higher-value services with structurally attractive margins. Optimize the operating model and capture economies of scale across existing markets. 2029 adjusted EBIT margin ambition reinforced at ~9.5%.
