GFT Technologies Named a Leader in Digital Banking Services for Fifth Consecutive Year by QKS Group

2026 SPARK Matrix™ recognizes GFT's end-to-end banking modernization capabilities and AI-enabled engineering

Stuttgart, November 19, 2026 – GFT Technologies (GFT) has been named a Leader in the QKS Group SPARK Matrix™: Digital Banking Services 2026 for the fifth consecutive year. The recognition **highlights GFT's capabilities** in **modernizing complex banking environments**, combining **deep financial services expertise**, **end-to-end engineering** and **AI-enabled delivery** to **help banks transform critical systems** while **maintaining operational continuity**.

The **2026 assessment evaluates** digital banking service providers across **Service Excellence** and **Customer Impact**. QKS Group highlights **GFT's experience with established and next-generation core banking platforms** and its ability to **support different modernization approaches**.

"GFT further differentiates itself through a connected portfolio of transformation frameworks, accelerators, and migration assets that bring greater structure and repeatability to complex banking programs while retaining flexibility around architecture, products, customer journeys, and technology ecosystems," said **Akhilesh Vundavalli, Principal Analyst at QKS Group**.

“Banks need to modernize the systems at the heart of their operations to unlock the full potential of AI. Being recognized as a Leader for five consecutive years reflects our commitment to turning that ambition into tangible business value. By making AI a native part of engineering and combining it with deep banking expertise, we help clients modernize complex environments with greater speed and confidence, without compromising the resilience and control their businesses require,” said **Marco Santos, Global CEO of GFT Technologies**.

End-to-End Modernization for Complex Banking Environments

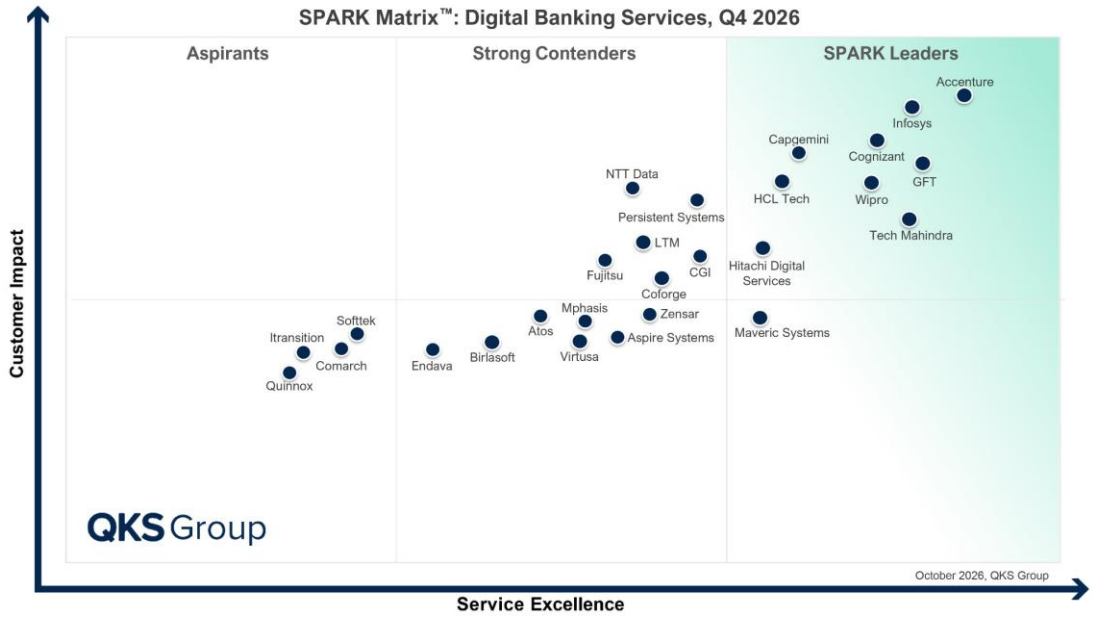

According to QKS Group, **GFT supports transformation programs** from strategy and architecture through platform implementation, systems integration, data migration, testing and ongoing operations. Its **experience across different core banking technologies** enables banks to pursue greenfield launches, phased modernization, dual-core coexistence or full core replacement, depending on their business and technology priorities.

AI-Enabled Engineering to Accelerate Transformation

QKS Group also highlights the **growing use of GFT's Wynxx platform** across requirements, software engineering, testing, legacy analysis and modernization. By integrating AI-assisted capabilities into delivery workflows, **GFT helps banks address legacy complexity** and **improve** the efficiency of **transformation programs**.

The SPARK Matrix™ provides a comparative assessment of digital banking service providers and examines their competitive positioning in the market.
