

GFT Technologies Partners with Google Cloud on Launch of Gemini Enterprise for Financial Services

Collaboration bolsters GFT's AI Modernization offering for leading financial institutions around the world

New York, August 25, 2026 – GFT Technologies today announced its partnership with Google Cloud on the launch of Gemini Enterprise for Financial Services, a new suite of AI capabilities designed to automate complex enterprise workflows for financial institutions. The partnership builds on GFT and Google Cloud's extensive collaboration and deep domain expertise to bolster GFT's [AI Modernization](#) services, which help clients modernize their core systems end to end with scalable, cloud-ready solutions.

“As legacy systems pose major obstacles to growth, compliance, and competitiveness, GFT's best-in-class methodology enables organizations across industries to lower costs, accelerate delivery cycles, reduce risk, and create a strong foundation for AI at scale,” said Christopher Ortiz, Group Chief Executive of Global Accounts & Partnerships at GFT. “We're excited to continue expanding that work with Google Cloud's Gemini Enterprise for Financial Services, which will deliver the high performance, efficiency, and safety that our clients expect of GFT.”

GFT Technologies is the trusted AI-centric digital transformation partner for leading global banks, insurers, and manufacturing/automotive companies, with a team of more than 12,000 technology experts in over 20 countries. GFT's use of Gemini Enterprise includes a project that transformed the SLDC operations of one of Brazil's largest banks. More broadly, GFT's AI Modernization services have helped clients achieve 60% reductions in operating costs and 30% faster time-to-market, including with [Wynxx](#), its enterprise-grade GenAI platform, proven in Tier-1 enterprises with up to 40% productivity gains and 90% time savings.

GFT is one of few select launch partners for Gemini Enterprise for Financial Services, in recognition of the company's decades of domain expertise, proven methodology, and global delivery capabilities. With this latest tool and other offerings, GFT will continue accelerating transformation and unlocking even greater value for its clients around the world.

"Partnerships are critical to helping enterprise customers successfully adopt and scale AI solutions," said Satish Thomas, Vice President, Google Cloud. "By pairing Google Cloud's Gemini Enterprise for Financial Services with GFT's proven methodology and global delivery footprint, we are giving financial institutions the tools and expertise they need to innovate faster, optimize operations, and create sustainable value."

About GFT

GFT Technologies is an AI-centric global digital transformation company. We design advanced data and AI transformation solutions, modernize technology architectures and develop next-generation core systems for industry leaders in Banking, Insurance, Manufacturing and Robotics. Partnering closely with our clients, we push boundaries to unlock their full potential.

With deep industry expertise, cutting-edge technology, and a strong partner ecosystem, GFT delivers responsible AI-centric solutions that combine engineering excellence, high-performance delivery and cost efficiency. This makes us a trusted partner for sustainable impact and client success.

Our team of 12,000+ technology experts operate in 20+ countries worldwide, offering career opportunities at the forefront of software innovation. GFT Technologies SE (GFT-XE) is listed in the SDAX index of the German Stock Exchange.
