

SUCCESS STORY

Galgo transforms on cloud to stay on top

An example of how GFT can add value from project scope management.

More than 23,000 funds on the platform

75% reduction in time to market, from 26 months to 6 months

Moving away from traditional "waterfall" methods to a modern Agile approach

CLOUD ENGINEERING

THE CHALLENGE

To develop a system capable of organizing and controlling all steps of the order routing process.

- MVP development to help users' pipeline through an innovative routing product;
- Increase the product offer, bringing new opportunities and improving the customer experience;
- 100% cloud solution, innovating the company's operating model.

THE ENGAGEMENT

A disruptive project based on Galgo's vision, initiated through inception and developed with the GFT experience.

- Inception performed on more than one level: with Galgo and its customers, expanding the perception through the real needs of users and bringing greater clarity to the problem;
- Digital culture transformation, bringing a new vision of processes, discoveries and development;
- Adaptive solution production ready to adjust to technological and market changes, as well as inclusion of new post MVP flows;
- Development in the cloud with Azure;
- Guided agile methodology, using Scrum framework.

THE BENEFIT

Security, transparency, traceability and visibility.

- MVP ready in 9 months.
- Innovative and disruptive solution in relation to the market;
- Greater security, transparency, visibility and control in all transactions;
- Greater range in the offer of services for its clients;
- Strengthening their leadership in the segment;
- Creation of opportunities for new businesses with integrated solutions together with partners.
